

A Dirty Coal Production:

Stop Murkowski's Attack on the Clean Air Act

- **"Stop the Murkowski Dirty Air Act"** This extreme attack on the Clean Air Act would create a huge loophole for big polluters like dirty coal plants and oil refineries.
- **It's time for the Senate to make comprehensive climate action a reality.** The planet cannot wait any longer for an effective plan to stop global warming pollution and the economy cannot wait any longer for the promise of 1.7 million new clean energy jobs.
- We need to get to work creating a **healthy, clean energy economy by investing in renewable energy technologies like solar, wind and geothermal.** Every day the climate bill is delayed, Americans lose out on good, green jobs.
